Enjoy Smart Life

Smart Generation WiFi Control (optional)

Wi-Fi is available as an option on all models of the Lomo range in both Apple and Android. After installing the “Gree+” app on your phone or tablet, you can remotely control the air conditioner from anywhere in the world.

Please ask your installer about this option as the Wi-Fi dongle must be installed by a licensed technician.

"iFeel" Remote Control

All units come with the Gree YAG1FB4 remote controller. Along with user and timer functions the YAG1FB4 also features “iFeel” control for greater comfort

Wired Wall Controller XK76 (optional)

The Gree Lomo range can be connected to a stylish wired wall controller. The wired wall controller offers 6 timer functions with a 14 day multi event timer, user function settings and a “child lock” capability.

“iChoose” LED Display

The Gree Lomo range features the new “iChoose” LED displays. The display will show power, mode and set point. Using the remote you can see indoor and outdoor ambient temperatures and when it’s time to sleep, the display can be switched off, leaving a pristine flat panel.

Smart Comfort

Smart Health

The Gree Lomo range comes with High Density Filters. These filters have a higher than normal density to filter more dust and pollen from the air. Mini Photocatalytic filters are also standard.

The Gree Lomo range has a coil drying function. When selected this automatically runs the indoor fan for a set period after switching the unit off. This dries the indoor coil to prevent the build-up of mildew.

Reliably Smart

- Soft Start software limits the compressor start up current
- Low voltage start up, provides protection against brown outs and poor power supplies
- Low power usage in standby mode, 0.5 watts
- Wide temperature cooling operation from $-10\sim 50^{\circ}\text{C}$
- Low temperature heating operation from $-15\sim 24^{\circ}\text{C}$

Intelligent Defrosting

Intelligent defrosting is designed to minimise the defrost time and reduce the number of defrost cycles; therefore, reducing energy waste.

Quietly Smart

The new Lomo range of heat pumps incorporates noise reducing technology. Coupled with 7 fan modes you get perfect airflow with quiet operation.

iFeel

All Gree Lomo heat pumps feature “iFeel” functionality in your hand held remote control. By pressing the “iFeel” button on the remote control the temperature to control the unit is recorded from a sensor in the remote control rather than at the indoor unit on the wall. “iFeel” gives intelligent temperature control where it is needed and provides a more comfortable environment.

3D Airflow

Gree Lomo provides a greater spread of air with Auto 3D Air Flow. To provide directed comfort, the air direction can be set left or right and up or down.

Turbo Cooling

Provides maximum airflow and performance for 30 minutes to rapidly cool a room.

Smart Installer Features

- Anti-corrosive coating on all printed circuit boards to help protect the electronics
- Dry connection for gate card or remote on/off operation, great for schools and hotels
- Blue fin coils for corrosion protection
- Mono / multi compatible
- Intelligent Auto Reset, with power off memory function

Gate Card

Blue Fin Hydrophilic Coil

Without intelligent auto restart

When electric appliances all start up right after power is resumed, they will impact the national grid and affect the safety of power supply.

With intelligent auto restart

Electric appliances start up at different times after power is resumed; therefore, impact to the national grid is decreased.
