

Huge savings on running costs and CO₂ emissions with Braemar ducted gas heating

Braemar proudly brings you the world's first six star ducted gas heater – the most efficient ducted gas heater available. And here's why ...

Savings per year (running costs) 4, 5 and 6 star ducted gas heaters vs 3 star*

Installing a six star instead of a three star ducted gas heater will save approximately \$370 per year in running costs!

CO₂ emissions savings per year (tonnes)* 4, 5 and 6 star ducted gas heaters vs 3 star*

Installing a six star instead of a three star ducted gas heater will save almost 1.4 tonnes of CO₂ per year, which is equivalent to taking a small car off the road for a year![^]

* Data is based on: • Gas price = 1.5c/MJ • House Size – 200m² x 2.4m ceiling height • Operation hours per year • 600 hrs (100 days at 6 hrs per day) – based on AS4556-2011 • House Heat load – 0.2 MJ/h/m² – based on AS4556-2011 • Annual Energy Consumption (AEC) for different star rated heaters based on AS4556-2011 • 3.0, 4.0, 5.0, 6.0 star rated ducted gas heating systems

[^] CO₂ emissions from small car based on: Table 15, "Carbon Emissions from New Australian Vehicles 2011 Information Paper", National Transport Commission Australia • Calculation assumes an annual travel distance of 7900 km/yr

* CO₂ emissions based on Australian Government Department of Climate Change and Energy Efficiency – National Greenhouse Accounts Factors July 2012

Note that these figures may vary for individual situations due to variation in factors such as gas price, house size and insulation, heater usage patterns etc.
