

Ultimate comfort
made easy.

That's the Daikin difference.

Daikin's new Ducted Zone Controller

Using the latest Japanese technology, Daikin's new Ducted Zone Controller was developed in Australia specifically for Australia & New Zealand conditions. So you can now control your Daikin Ducted Air Conditioning System to deliver ultimate comfort to different areas of your home.

Daikin's new state-of-the-art Ducted Zone Controllers have innovative features to make it easy for you to enjoy the comfort of your own home even more.

There are four models to help you tailor your Daikin Ducted System exactly to your needs. The right level of comfort where and when you want it.

There is a backlit display to make it easy for you to view the controller's functions. Its advanced design gives you the flexibility to install your controller in a location of your choice. Plus the easy to read type rather than symbols makes this new controller even more user friendly.

AN EASY CHOICE

The ability of a Daikin Ducted System to deliver ultimate comfort is maximized by your choice of controller. There are four available so you can match one to the size and number of zones in your home with the controller that's right for your needs.

- BRC230Z4 for up to four zones (230 – 240 volt damper motors)
- BRC230Z8 for up to eight zones (230 – 240 volt damper motors)
- BRC24Z4 for up to 4 zones (24 volt damper motors)
- BRC24Z8 for up to 8 zones (24 volt damper motors)
- Plus the BRCSZC is a second slave controller.

Any one of these new Daikin Ducted Controllers can put you in the zone – the ultimate comfort zone.

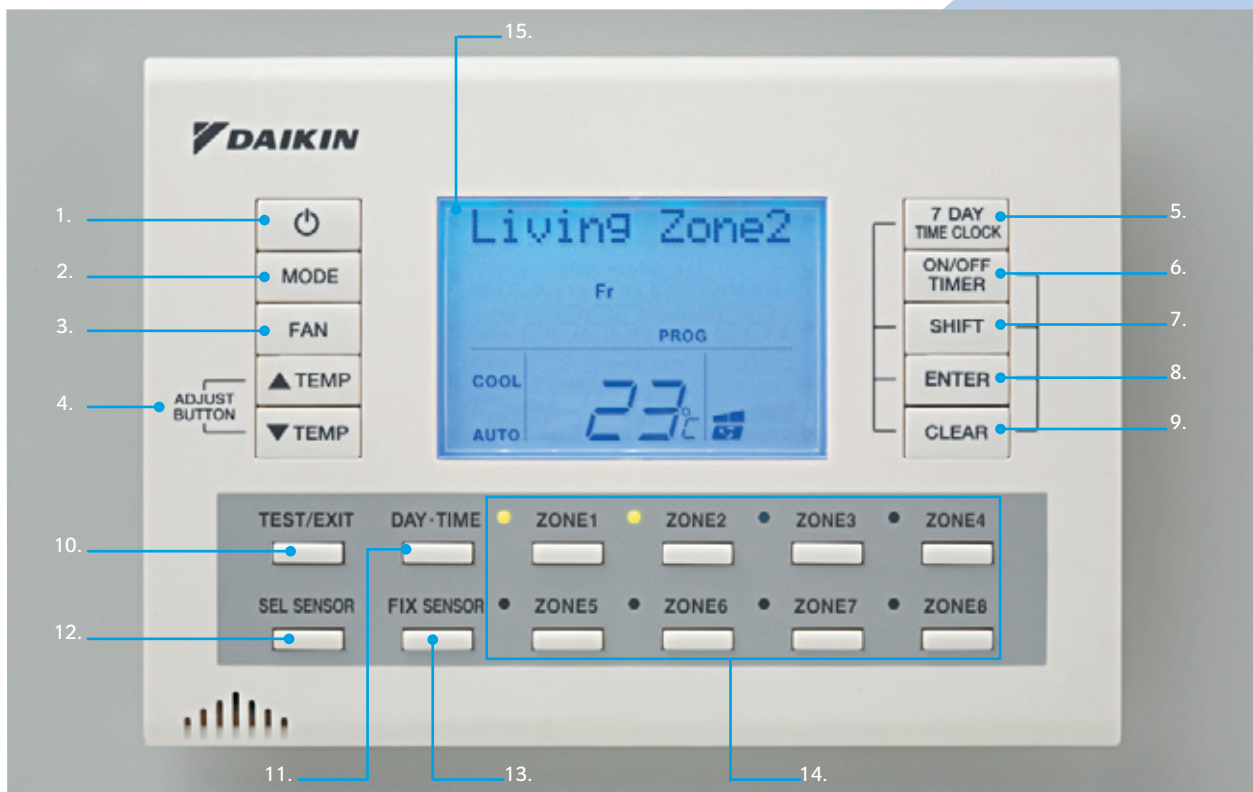

THE RIGHT MODE OF COMFORT AT THE RIGHT TIME

MODES:

Five different basic modes allow you to enjoy the particular level of comfort you require. There are Cooling and Heating modes. The Auto mode selects either the Cooling or Heating mode for you, depending on the set temperature and current room temperature. The Program Dry mode is a dehumidification mode. This gives priority to reducing humidity rather than room temperature by controlling the compressor and indoor fan. Plus the Fan Only mode operates the indoor fan simply to create air movement.

Sensor Selection enables the indoor room temperatures you select to be sensed from one of up to five locations. There is a sensor located in the indoor fan coil unit. Another is in the master zone controller itself. Plus there are two optional remote temperature sensor kits and one sensor located in the optional second slave controller. These options are both sold separately.

Easy to operate

1. **ON/OFF** – Press this button to turn the air conditioner ON and OFF.
2. **MODE selector** – Press this button to select the AUTO/COOL/HEAT/DRY/FAN mode.
3. **FAN setting** – Press this button to select the air flow rate.
4. **TEMPERATURE adjustment button** – Press this button to make temperature adjustments and other settings.
5. **7 DAY TIME CLOCK** – Press this button to go to the setting display for the “S. 7 Day Timer” and “M. 7 Day Timer”.
6. **ON/OFF TIMER** – Press this button to set the ON TIMER and OFF TIMER.
7. **SHIFT** – Press this button to change the display at the time of making settings.
8. **ENTER** – Press this button to accept the settings that have been made.
9. **CLEAR** – Press this button to cancel settings.
10. **TEST/EXIT** – Press this button to exit programs.
11. **DAY/TIME** – Press this button to go to the clock and day setting.
12. **SELECT SENSOR** – Press this button for sensor selection.
13. **FIXING SENSOR** – Press this button to enter the sensor selection that has been made.
14. **ZONE** – Press this button to make zone settings.
15. **DISPLAY** – The present settings are displayed on the LCD.

Easy to set and program

The three different timer and time clock operations of the new Daikin Ducted Zone Controller makes it easy for you to enjoy ultimate comfort when and where you want it.

The Countdown On-Off Timer programs your ducted system to be turned on and / or off after a pre-set number of hours. You can select this pre-set time in 1 hour increments from 1 – 12 hours. The unit starts counting down from the moment it has been set and the timer is non-repetitive.

The Simple 7-day Time Clock allows the user to program the controller to turn the Daikin Ducted System on and / or off at set times for every day of the week. Up to two on and two off programs can be set for each day to suit your lifestyle. You can link modes and set temperatures to each program.

The Comprehensive 7-Day Timer Clock does everything the simple 7-day time clock does and more. Zone on-off control and temperature sensor selection can also be programmed into the time clock

giving you an even greater ability to tailor the system to suit your lifestyle.

The Filter Cleaning Reminder periodically alerts you to clean the return air filters of your system so it operates at maximum efficiency.
